## DESCRIPTION

Write a program that prints the numbers from 1 to 100.

But for multiples of **three** print "Fizz" instead of the number and for the multiples of **five** print "Buzz".

For numbers which are multiples of both **three** and **five** print "FizzBuzz".

## BACKGROUND

The Fizzbuzz coding challenge was invented in 2007 by Imran Ghoryin in order to assess developer competence.

Since its conception the Fizzbuzz challenge has been used by Facebook and Microsoft as interview tools and has also been taught at Stanford, Berkley, Caltech and countless other universities.

### TECHNOLOGIES USED

HTML JavaScript jQuery CSS Bootstrap

## EXTRA CREDIT

Modify the program to allow a user to enter two integers (instead of hard coding 3 and 5) and print the appropriate result based on multiples of their input.
